(54) Title: RUBBER COMPOUND FOR GOLF BALL AND GOLF BALL		
(57) Abstract A golf ball particularly suitable for use in playing a game of compact golf is disclosed. The golf ball comprises an inner core of resilient rubber and an outer cover made of SURLYN. The rubber is a halobutyl polymer containing defined amounts of carbon black. The ball gives a diminished rebound off a wall when compared with a traditional golf ball which makes it suitable for use on golf courses of reduced scale.
