

ABSTRACT**FACSIMILE APPARATUS**

Handset holder 3 and operation panel 4 of upper cover 1 are integrated so that a B4 size document can be inserted with keeping the apparatus size handy. And to prevent handset 2 from falling out of handset holder 3 when upper cover 1 is opened, it is designed that a face of receiver 6 and an internal face of concavity section 9 are contacted in faces when upper cover is full opened, and the depth h_2 of concavity section 9 in contact face 31 is larger than the thickness h_1 of handset 2.
