

METHOD AND APPARATUS FOR DISPLAYING DATA OF GROUP SUPERVISORY CONTROL OF ELEVATORS

ABSTRACT

A method and an apparatus for displaying data of a group supervisory control of elevators are provided. By displaying a predicted value and an actual value of a group supervisory control or a relation between the predicted value and the actual value on a time axis, it can be evaluated and examined whether an allocation operation is performed properly in an allocation control for selecting an elevator car for an elevator stop call based on an allocation evaluation index including a plurality of allocation evaluation items.
