

WIRELESS COMMUNICATION DEVICE, WIRELESS COMMUNICATION
METHOD, AND PROGRAM

ABSTRACT

5

[Object] To provide a wireless communication device, a wireless communication method and a program capable of contributing to improvement of wireless communication technology related to IDMA.

[Solution] Provided is a wireless communication device including: a wireless
10 communication unit that performs wireless communication using interleave division multiple access (IDMA) with another wireless communication device; and a controller that controls an interleave length in an interleave process for IDMA by the wireless communication unit.
