

ABSTRACT

A virtual scene interaction data processing method and apparatus, an electronic device, a computer readable storage medium, and a computer program product. The method comprises: displaying a virtual scene, wherein the virtual scene comprises a virtual object; in response to a trigger operation for a virtual task, displaying an indication mark of the virtual task in the virtual scene, wherein the indication mark is used for pointing to a target position of the virtual task from a current position of the virtual object; and in response to satisfying a display condition of a minimap, displaying the minimap in the virtual scene, wherein the target position is displayed in the minimap.
