(54) Title: SOIL IMPROVER

(57) Abstract: A soil improver and method for making the same. The soil improver, in one example, comprises a nitrogen source, a surfactant, a multi-mineral, and a microbial blend. The microbial blend comprises at least one bacterium, at least one fungus, and at least one mycorrhiza. The mycorrhizae mine water and nutrients for plant roots in exchange for food. Further the mycorrhizae greatly expands the effective root zone of the host plant. The soil improver is made by mixing the dry ingredients. Thereafter the microbial blend is mixed with the dry ingredients.
