(54) Title: FLASH CAMERA WITH EXTENDABLE ARM FOR DISABLING THE FLASH UNIT

(57) Abstract: A flash camera (10) has an extendable arm (12) mechanically coupled to a flash on/off switch (14). The arm (12) extends from the camera body (10) when the switch (14) is on the "on" position (18), and automatically retracts and returns the switch (14) to the "off" position (16) if the extended arm (12) is bumped or touched. The arm (12) also serves to provide a visual indication that the flash switch (14) is in the "on" position (18).
