

ABSTRACT

**NEW AMINO ACID COMPOUNDS,
A PROCESS FOR THEIR PREPARATION
AND PHARMACEUTICAL COMPOSITIONS CONTAINING THEM**

5 Compound of formula (I) :

wherein :

- 10 $\blacktriangleright$ R_1 represents an aryl group, a heteroaryl group or an alkyl group which is optionally substituted, or a group of formula $-(\text{CO})-\text{CR}_6\text{R}_7\text{NR}_8\text{R}_9$ wherein R_6 , R_7 , R_8 and R_9 are as defined in the description,
- $\blacktriangleright$ R_2 represents a hydrogen atom or an alkyl group,
- $\blacktriangleright$ R_3 represents a hydrogen atom or an optionally substituted alkyl group,
- 15 $\blacktriangleright$ R_4 represents a saturated or unsaturated, 7- to 15-membered bicyclic system or an optionally substituted alkyl group,
or R_3 and R_4 , together with the carbon atom carrying them, form a saturated or unsaturated, 3- to 18-membered, mono-, bi- or tri-cyclic system optionally containing one or more hetero atoms selected from O, S and N and optionally substituted,
- $\blacktriangleright$ n represents zero, 1 or 2,

➤ Ar represents an aryl or heteroaryl group,

➤ R₅ represents an amino group, a guanidino group, a cyano group or an amidino group which is optionally substituted,

its optical isomers, and also addition salts thereof with a pharmaceutically acceptable acid.

5 Medicaments.
