Abstract

The present invention provides a compound having excellent regulating action on blood lipid level.

The present invention provides a compound represented by the following general formula (I) or a pharmacologically acceptable salt thereof, etc., wherein A represents a 5-membered nitrogen-containing aromatic heterocyclyl group; R^1 represents COOH or the like; each R^2 represents an alkyl or the like; each R^3 represents an optionally substituted phenyl, an optionally substituted phenylalkyl, or the like; m represents 0, 1, 2, or 3; n represents 0 or 1; each of R^4, R^5, R^6, and R^7 represents H, an alkyl, or the like; and B represents an optionally substituted naphthyl, an optionally substituted aromatic heterocyclyl, or a group represented by the following formula (II) wherein each of B^1 and B^2 represents an optionally substituted phenyl or an optionally substituted aromatic heterocyclyl.
