Claims

1. A dishwasher comprising:

a washing station for cleaning eating utensils, the washing station comprising:

a first side comprising:

at least one inlet for receiving a first batch of eating utensils; and

at least one outlet for discharging a second batch of eating utensils.

2. The dishwasher of claim 1 further comprising

at least one door for closing an opening of the washing station during the cleaning process.

3. The dishwasher of claim 2, wherein

the at least one door is detachable from the washing station.

4. The ~~versatile~~ dishwasher of claim 1, further comprising a carrier comprising at least one rack for carrying at least one basket in order to hold the eating utensils.

5. The dishwasher of claim 4, wherein

the at least one rack is adjustable for fetching the eating utensils from the washing station.

6. The dishwasher of claim 1, wherein the at least one inlet comprises a first inlet and a second inlet for receiving soiled eating utensils independently.

7. The dishwasher of claim 1, wherein

the at least one outlet comprises a first outlet and a second outlet for discharging cleaned eating utensils.

8. The dishwasher of Claim 1 further comprising

a locking mechanism for fastening a part of the washing station.

9. The dishwasher of Claim 8, wherein

the locking mechanism comprises a shut-tight door, a latch or both.

10. The dishwasher of Claim 1 further comprising

a warning device for alerting operating status.

11. A dishwasher comprising:

a washer for cleaning eating utensils, the washer comprising a first inlet, a second inlet, a first ~~out~~ outlet and a second outlet;

wherein the washer is configured to transfer the eating utensils from one of the inlets to one of the outlets for cleaning; and

wherein the first inlet and the first outlet are positioned on a common side of the dishwasher.
