(54) Title: TEMPLATE FOR DRIVING A PILE ON A PREDETERMINED POSITION; METHOD OF DRIVING A PILE ON A PREDETERMINED POSITION

Fig. 1

(57) Abstract: Apparatus (8) for positioning piles relative to one another in a substrate (14), comprising a template (10) and a pile guide (12) releasably attachable to the template (10) in any one of at least a first location (20) and a second location (22) when guiding a pile into the substrate. The first and second locations (22, 24) are spaced apart to enable the pile guide (12) to be releasably attached to the template (10) in different positions relative thereto. The template (10) includes apertures (38) which define part of an integral guide for a pin pile for pinning the template (10) to the substrate (14).
