(54) Title: METHODS, SYSTEMS, AND DEVICES FOR PROCESSING HEALTH-RELATED INFORMATION

Fig. 10

(57) Abstract: Embodiments relate to a method for processing and/or managing health-related information. An example method may include establishing one or more communication channels, receiving a plurality of information, processing received information, deriving a first ranked list of recommendations, deriving a second ranked list of recommendations, deriving a third ranked list of recommendations and deriving a final ranked list of recommendations. The method for processing and/or managing health-related information may further include responsive to a selection of a recommendation by the user, updating the current set of information and the health score based on the selected recommendation. The method for processing and/or managing health-related information may further include generating a modified health score for each recommendation wherein the modified health score for each recommendation represents the health score for the user if the recommendation is selected.
