

## DRUM-TYPE WASHING MACHINE

## ABSTRACT

A drum-type washing machine according to the present disclosure  
5 includes a main body, a water tub having a water-tub opening, a rotary drum  
having a drum opening, a motor, a lid body having an inner lid that projects  
toward an interior of the water tub, and a packing member connecting a front  
opening and the water-tub opening. The packing member includes a cylinder  
extending rearward from the front opening, a bulge connecting with the  
10 water-tub opening, a lip that is provided at a front end of the cylinder and  
abuts the inner lid when the lid body is closed, and a rib provided to the  
cylinder to be nearer to the water-tub opening than the lip is. The rib has a  
greater thickness and a greater height than the lip. The rib is free from  
contact with the inner lid when the lid body is closed.
