

ABSTRACT

The present invention provides an information processing method and a terminal. The information processing method applied to a terminal includes: determining a priority of first information; and performing, based on the priority of the first information, an operation associated with the priority of the first information; where a RAT corresponding to the first information is NR; and the priority of the first information is a first priority corresponding to the first information or a dedicated priority; or the priority of the first information is determined according to a predefined rule.
