(54) Title: PEST CONTROL

(57) Abstract

Pest control apparatus and method comprising a surface (4, 14) on to, above or in the region of which a pest is capable of being directed, attracted or otherwise lured and which bears a particulate material (7, 17) incorporating a killing or behaviour-modifying agent, wherein the particulate material (7, 17) is capable of being rendered airborne by movement of the pest on, above or in the region of the particulate material-bearing surface (4, 14). The surface (4, 14) may form part of a tubular (1) or planar (11) trap and may be further provided with a pheromone or other attractant (5, 15) and recesses (6, 16) for retention of the particulate material (7, 17) therein.
