

ABSTRACT

The embodiments of the present disclosure disclose a menu display method, apparatus, device and storage medium. The menu display method includes: displaying a text selection menu according to current display location information of a text content on a screen when
5 a selection operation for the text content in a current view control is detected; acquiring the final display location information of the text content on the screen after a sliding operation completes, in response to detecting the sliding operation for the view control; and redisplaying the text selection menu according to the final display location information. The embodiments of the present disclosure can improve the interactivity of
10 the text selection menu.
