PLATFORM FOR DATA SERVICES ACROSS DISPARATE APPLICATION FRAMEWORKS

ABSTRACT OF THE DISCLOSURE

Data management between a common data store and multiple applications of multiple disparate application frameworks. A data storage component is provided that facilitates the storage of data, which data includes structured, semi-structured, and unstructured data. A common data platform interfaces to the data storage component to provide data services accessible by a plurality of disparate application frameworks, which data services allow a corresponding application of the different frameworks to access the data.
