REUSABLE AUTO- INJECTOR

Abstract

An injection device comprises a first sub-assembly. The first sub-assembly comprises a chamber (116) for holding a fluid. The chamber comprises an inner surface and an exit aperture (114). The first sub-assembly comprises a stopper (112) movably disposed within the chamber and having an outer surface substantially in contact with the inner surface about its perimeter. The first sub-assembly comprises an adapter (118) adapted to transfer fluid into the chamber.
