(54) Title: CERVICAL PILLOW FOR TREATMENT OF CERVICAL SPINE DISEASES

FIG. 1

(57) Abstract: A cervical pillow for treatment of cervical spine diseases includes a padded member made of resilient materials such as foam, rubber, or cotton. The padded member has a rectangular flat bottom side, vertically flat left and right sides, a rounded front side, a thin back side, and a wavy top side that has a flat portion connecting to the front side, a slightly concave portion in the middle, and a very convex portion connecting to the back side. The cervical pillow further includes a nearly rectangular solid block made of high-strength materials such as plastic or compressed rubber. This solid block is embedded within the padded member along its back side and under the very convex portion of its top side.
