

Random Number Generator

ABSTRACT

The present invention relates to a random number generator for providing a random number and/or a random number combination and/or a random number matrix. According to the invention, the random number generator comprises a monitoring apparatus for monitoring at least one game of skill/skilled sport installation on which a game of skill/skilled sport which provides at least one game outcome can be executed by at least one participant, wherein the monitoring apparatus comprises game outcome determination means for determining the game outcome, and a determination device for determining the random number and/or random number combination and/or random number matrix from one more determined game outcomes.
