WO 2019/012131 A1

(54) Title: CONCEPT FOR GENERATING AN ENHANCED SOUND FIELD DESCRIPTION OR A MODIFIED SOUND FIELD DESCRIPTION USING A MULTI-POINT SOUND FIELD DESCRIPTION

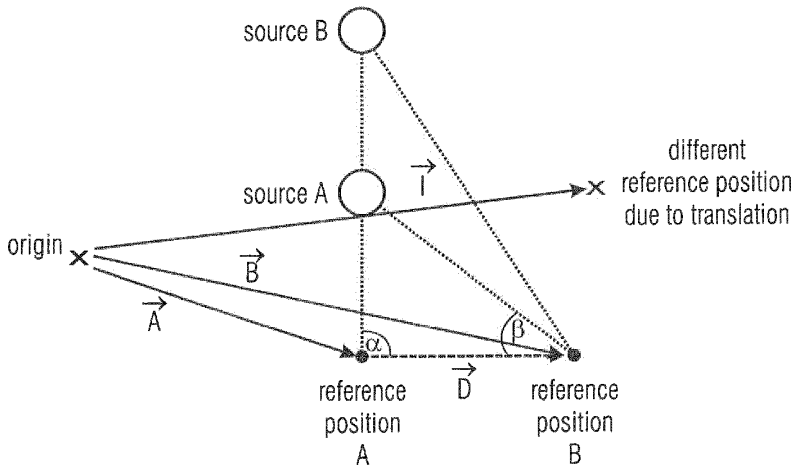

Fig. 4c

(57) Abstract: Apparatus for generating an enhanced sound field description, comprising: a sound field generator (100, 250, 260) for generating at least one sound field description indicating a sound field with respect to at least one reference location; and a meta data generator (110) for generating meta data relating to spatial information of the sound field, wherein the at least one sound field description and the meta data constitute the enhanced sound field description. The at least one sound field description comprises in a certain case a first sound field description related to the at least one reference location and a second sound field description related to a further reference location being different from the reference location, and the meta data relating to the spatial information indicates the reference location and the further reference location or one of both reference locations and a vector extending between both reference locations.
