(81) Designated States (unless otherwise indicated, for every kind of national protection available): AE, AG, AL, AM, AO, AT, AU, AZ, BA, BB, BG, BH, BN, BR, BW, BY, BZ, CA, CH, CL, CN, CO, CR, CU, CV, CZ, DE, DJ, DK, DM, DO, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, GT, HN, HR, HU, ID, IL, IN, IQ, IR, IS, IT, JM, JO, JP, KE,

(54) Title: SYSTEMS AND METHODS FOR DIRECTORY SERVICE BACKUP AND RECOVERY

FIG. 1

(57) Abstract: Various implementations implement a standby directory service. For example, an example process may include obtaining user data associated with an activity of a user via a sensor in a physical environment. The process may further include, at a device including one or more processors, determining that an interruption event has occurred at a host directory service, wherein the device and the host directory service are communicatively coupled via a first network protocol associated with a first network, and in response to determining that the interruption event has occurred at the host directory service, implementing a standby directory service, wherein the standby directory service is generated and updated via a second network protocol that is different than the first network protocol.
