(54) **Title:** WASHABLE LAYERED CUSHION

FIG. 1

(57) **Abstract:** A layered cushion (300) that may be fully disassembled for easy cleaning is disclosed herein. The sleep system is durable and fire retardant. The layered cushion (300) may include a foam layer (302), a layer of void cells (304), and a cover (308). The foam (302) permits fluids to move freely there through and contours to a users body to maximize comfort and reduce interface pressure. The reticulated foam layer (302) resists compression set and thermosetting. The layer of void cells (304) also permits fluids to move freely there through and provide additional support to the users body. The individual void cells of the void cell layer (304) are perforated to allow the transmission of fluids there through. The cover (308) couples the other layers together to form the layered cushion (300) and prevents the layers from deteriorating. The cover (308) is removable to permit cleaning each of the layers independently.

**Published:****(88) Date of publication of the international search report:**

28 February 2013

- *with international search report (Art. 21(3))*
- *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments (Rule 48.2(h))*
