

ELECTRONIC APPARATUS AND DATA OUTPUT METHOD OF ELECTRONIC APPARATUS

ABSTRACT

5

A Japanese expression is displayed as a question on a touch panel display 15. When an English expression is input by handwriting as an answer, determination is made as to whether the input answer coincides with an English word that is an answer. If the input answer is correct, a mark "o" is displayed and to inform the user of correctness. On the other hand, if the input answer is incorrect, a Japanese word corresponding to the English word input as the answer is displayed with a mark "x" to inform the user of incorrectness.
