(54) Title: USE OF A CLASS OF ORGANIC ACID METAL COMPOUNDS AS ANIMAL FEED ADDITIVES

(57) Abstract: The present invention belongs to the field of animal feed additives, and in particular relates to the use of a class of organic acid metal compounds and/or solvates thereof as animal feed additives or in the preparation of animal feed additives. The organic acid metal compound and/or the solvate thereof provided in the present invention can effectively make animals gain weight and increase feed conversion rate, and has a good effect on improving production performance of animals. Furthermore, when applied to animals, the organic acid metal compound and/or the solvate thereof provided in the present invention basically has no residues remaining in muscles, liver and other tissues of food animals.
