(54) Title: AQUEOUS DISPERSIONS DISPOSED ON GLASS-BASED FIBERS AND GLASS-CONTAINING SUBSTRATES

(57) Abstract: An article including at least one layer of a compound disposed on at least a portion of a glass-containing substrate, wherein the compound includes a polyolefin having a deformation temperature of less than 110°C and a dispersion stabilizing agent, wherein the compound imparts a modified property to the substrate, and wherein the substrate is formable. Other embodiments include a compound in contact with a portion of a glass-containing substrate, such as glass-containing or glass-based articles and fibers, wherein the compound at the time of contacting included an aqueous dispersion having (a) a polyolefin having a deformation temperature of less than 110°C, (b) a dispersion stabilizing agent; and (c) water, wherein the compound imparts a modified property to the substrate, and wherein the substrate is formable.
