WO 03/049725 A3

(54) Title: COMPOSITIONS FOR THE TREATMENT OF LUPUS, OTHER RHEUMATIC DISEASES AND JOINT DISEASES

(57) Abstract: A composition and a method for the amelioration of Lupus, related rheumatic diseases and inflammatory joint diseases. The composition consists of a bioflavonoid combined with Bromelain. Vitamin C may be added to the composition to improve its efficacy. The preferred flavonoid is Luteolin or Quercetin. Myricetin may also be used as may be a glycoside such as Rutin that contains either Luteolin, Quercetin or Myricetin as an aglycone. Other effective flavonoids can be selected by their ability to interact with the Kv1.3 channel of lymphocytes. In preferred method of treatment a mixture of flavonoid, Bromelain and Vitamin C is administered at least daily by an oral route. A mixture of 500 mg Quercetin, 500 mg Bromelain and 500 mg Vitamin C administered three times daily is effective.
