(54) Title: VASCULAR INSTRUMENT DELIVERY DEVICE AND RELATED SYSTEMS

FIG. 1A

(57) Abstract: An instrument delivery device to couple to a vascular access device. The instrument delivery device may include a housing (14), which may include a distal connector (16), a proximal connector (18), and a lumen extending through the distal connector and the proximal connector. The instrument delivery device may include a vascular access instrument (12), which may include a distal end (22) and a proximal end (24). The vascular access instrument may be disposed within the lumen of the housing in a coiled position. The vascular access instrument may be configured to move from the coiled position to an uncoiled position and advance through the distal connector. The vascular access instrument may extend through the vascular access device into vasculature of a patient.
