(54) Title: DISPLAY FOR PUBLIC USE

(57) Abstract: In a basic embodiment of a display for public use including a stand, an internal computer and an internal air conditioning system, the computer (10) is arranged according to the invention inside a housing (7) of the display, an evaporator (1) of an air conditioning device acting as an air delivering member is connected from below to an opening (18) in the floor panel of the housing (7) of the display, with said device being arranged inside the hollow stand (8) of the display, while a compressor (2) of the air conditioning device acting as a member for drawing in air is arranged on the floor panel of the stand (8). Modifications of said solution refer to standless displays providing the equipment either entirely in the housing of the display or entirely outside the housing of the display or partly inside partly outside.
