

## IMAGE PROCESSING APPARATUS, IMAGE PROCESSING METHOD, AND IMAGE PROCESSING PROGRAM

### ABSTRACT

An image processing apparatus includes an image processing mechanism, a display device, an input device, a web browser, a first web server, a second web server, and an update unit. The image processing mechanism performs image processing including at least one of image formation on a medium and image reading on a medium. The web browser displays a web page for receiving a user input on the display device and receives a user input via the input device. The first web server which provides the web page in response to a request from the web browser rather than from an external apparatus stores setting information for an application which is executed in accordance with the setting information in response to the request. The second web server receives update information of the setting information from the external apparatus. The update unit updates the stored setting information with the update information.
