(54) **Title**: BOOKING SYSTEM AND METHOD

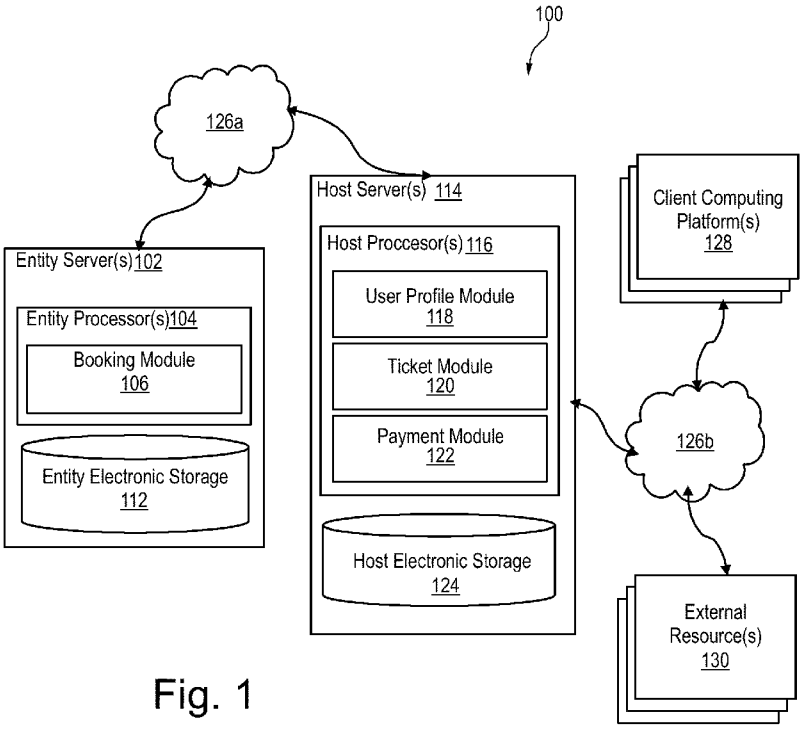

Fig. 1

(57) **Abstract**: A method and system for storing, by a host server, in a ticket database, information related to a plurality of restaurants, the tickets containing an available status or an unavailable status. The method and system may display, by the host server, the tickets with the available status. The method and system may receive, by the host server, a request from the first user computing device to purchase a ticket with an available status. The method and system may receive, by the host server from the first user computing device, a cancelation request for the ticket and may resell, by the host server, the ticket to a second user computing device. The method and system may credit, by the host server, the payment for the ticket to the first user computing device.
