

## Spinning Reel for Fishing

[Document Name] Abstract

[Abstract]

[Object] To provide a spinning reel for fishing that prevents generation of abnormal noise and damage to the fishing line that are caused by rubbing of the fishing line during the reel-in operation thereof.

[Solution] A spinning reel for fishing includes a line roller 20 that guides a fishing line N to a spool 3 around which the fishing line N is wound and held; wherein the line roller 20 includes a shaft 15, bearings 22, 23 and a roller 21 that is rotatably provided on the shaft 15 by means of the bearings 22, 23; the roller 21 has: a fishing-line guiding portion 21a that is formed on a bail support member 6 side and guides the fishing line N to the spool 3, a fishing-line steering portion 21b that is larger in diameter than the fishing-line guiding portion 21a and steers the fishing line N to the fishing-line guiding portion 21a, and a fishing-line regulating portion 21c that is inclined between the fishing-line guiding portion 21a and the fishing-line steering portion 21b and regulates the movement of the fishing line N in the axial direction of the shaft 15.
