(54) Title: METHODS OF DRUG DELIVERY TO HEPATOCYTES AND TREATMENT OF FLAVIVIRIDAE INFECTIONS

(57) Abstract: A method of delivering a drug to a hepatocyte includes a step in which a carboxamidine group-containing compound is provided to a hepatocyte having a transporter that transports the compound across the plasma membrane of the hepatocyte, wherein the transport of the compound is substantially not inhibited by ribavirin. Further contemplated methods include a method of inhibiting growth of a virus of a family of flaviviridae in a cell containing system, in which contemplated compounds are presented to a cell in the cell containing system.
