(54) Title: CONNECTOR GUIDE MEMBER

(57) Abstract: A shroud (100, 400) that forms a guide channel for a connector (200) is disclosed and it has the shape of an inverted U-shape, with a press tab (117, 420) for engaging a mating connector. The shroud has notches (135, 405) and tabs (118, 406) formed on it that serve to orient the mating connector for entry into the shroud. A placement member (300) is also described and it serves to hold the connector (150) and the shroud together as a single unit for robotic placement of the shroud and connector in preselected positions on the circuit board (110).
