

ABSTRACT

STORAGE CONTAINER OF SCRUBBING MEMBER AND
PACKAGE OF SAME

5 A storage container of a scrub member includes a container main body and a lid
body engaging with the container main body, where the scrub member is accommodated
in an internal portion of the storage container surrounded by the container main body and
the lid body, and a ventilation groove which communicates the internal portion of the
storage container and an outside of the storage container is formed on an engagement
10 surface where the container main body and the lid body are engaged.
