Abstract

CARRYCOT

A carrycot comprising a carrycot body formed of foam material and a mounting bracket formed of a hard material. The mounting bracket covers a bottom portion of the carrycot body, and the mounting bracket and the carrycot body cooperatively form an integral structure. The carrycot body includes a first wall extending along a longitudinal direction of the carrycot body and a second wall extending along a transverse direction of the carrycot body, wherein the first wall has a greater thickness than the second wall.
