(54) Title: SYSTEM AND METHOD FOR DEPLOYING A PLURALITY OF TOOLS INTO A SUBTERRANEAN WELL

(57) **Abstract**

A system for, and method of deploying a selected one of a plurality of tools into a subterranean well and a well employing the system or the method. In one embodiment, the system includes: (1) a tool selector capable of receiving each of the plurality of tools into a separate location thereof and placing a selected one of the plurality of tools proximate an entrance to the subterranean well in response to a tool selection command and (2) a tool displacement mechanism, couplable to the selected one of the plurality of tools, that causes the selected one of the plurality of tools to enter and traverse at least a portion of the subterranean well.
