(54) Title: FOOD PRODUCT AND DEVICE AND METHOD FOR MANUFACTURING THE SAME

Fig. 1

(57) Abstract: The present invention is related to a device (1) for the manufacture of a product that imitates properties of meat and fish and their role in diets, comprising an extruder (2) and a cooling die (4) arranged downstream of the exit (2c) of the extruder, characterized in that an inlet port (5) for the insertion of cellular material is provided in a region of the extruder (2) in the vicinity of the extruder outlet (2c) to the outlet of the cooling die (4), preferably between the exit (2c) of the extruder (2) and the outlet of the cooling die (4). The present invention is also related to a system (12) comprising said device (1), to a method for the manufacture of a product that imitates properties of meat and fish and their role in diets with said device (81) or system, and to a product that imitates properties of meat and fish and their role in diets.
