(54) Title: CONTROL STICK

FIG. 1A

(57) Abstract: A control stick including a stick assembly including: an outer tube-like opaque wall; an annular light guide structure disposed inside the outer tube-like opaque wall in a concentric manner wherein an annular end surface of the annular light guide structure is flushed with a first end of the outer tube-like opaque wall; and an elongated central axial member fitted inside the annular light guide structure and held by the annular light guide structure. A first axial end of the elongated central axial member is directed in a same first direction as the first end of the outer tube-like opaque wall. A second axial end of the elongated central axial member includes a control-engagement-element for engaging with a control stick mechanism. The control stick further including at least one light source disposed to transmit light to the annular light guide structure which is directed to the annular end surface thereof.
