

OIL-IN-WATER STICK TYPE COMPOSITION

ABSTRACT OF THE DISCLOSURE

The present specification discloses an oil-in-water stick type composition comprising an aqueous phase and an oil phase containing wax; and polysorbate and a sorbitan ester derivative at a weight ratio of 1 : 0.86 to 3. In an aspect, the composition of the present disclosure has a rigid stick shape while having an oil-in-water formulation to secure convenience in use. In an aspect, feel of refreshment is provided by a high water content and a high level of glossiness is imparted by the addition of branched hydrocarbon wax when the composition of the present disclosure is used. Hence, the composition of the present disclosure may be utilized as a cosmetic for lips, particularly lip tint, which provides feel of moistness and volume at the time of use as an example.
