(54) Title: A SYSTEM AND METHOD TO REGISTER, IDENTIFY AND AUTHENTICATE ENTITY ON DIGITAL PLATFORM

(57) Abstract: The present invention generally relates to cybersecurity, specifically a system and method to register, identify and authenticate entity on digital platform. The system comprises several integral components: a registration and identification module to collect and verify information of entities, an identifiers generator or capturer to create, assign or capture a unique identifier for registered entities, a comprehensive registry database for information storage, an authentication module for identity verification during digital access attempts, a digital footprint capturer to monitor and log online activities of the entity, a notification module that issues alerts concerning potential cyber threats, and a platform to facilitate requests related to entity authentication, detailed information retrieval, and reporting of suspicious cyber activities.
