(54) Title: DEVICE FOR PREPARING INFUSED BEVERAGES.

(57) Abstract: The invention relates to a device for preparing an infused beverage. The device includes an infusion container for containing liquid and comprising an opening to allow liquid to flow out of the container. The device further includes a receptacle comprising a cavity for receiving a cartridge containing infusible matter. The infusion container and the receptacle are operable in relation to each other to be arranged in a position wherein the infusion container and the cavity communicate through the opening. The device further comprises an openable and closable passage communicating with the cavity to allow liquid to flow from the infusion container to the passage through the cavity. The device further includes a cleaning means for introducing a liquid and/or vapour within the infusion container and a removing means for removing the cartridge from the cavity. An operating means is arranged for operating the cleaning means and the removing means successively.
