

TITLE

UNDERPANTS-TYPE ABSORBENT ARTICLE

ABSTRACT

5 An underpants-type absorbent article (1) has a pair of waist portions (1F, 1B) and an inseam portion (1C), both sides in a left-right direction of each of the pair of waist portions (1F, 1B) being joined at a pair of junctions (2). The underpants-type absorbent article (1) is characterized in that: each waist
10 portion (1F, 1B) has an upper region (1FU, 1BU) and a lower region (1FL, 1BL) when the waist portions (1F, 1B), in an expanded state, are divided into two in an up-down direction; and the lower region (1FL, 1BL) of at least one waist portion of the pair of waist portions is provided with an insect repellent (40).
