

ABSTRACT OF THE DISCLOSURE (FIG. 1)

"METHOD AND APPARATUS FOR SERVO
WRITING IN A DISK DRIVE"

5

In a self-servo writing method, servo data is re-recorded, and thereby, servo data having worsened recording quality is rewritten. According to the method, the servo data is recorded in an entire range on a disk medium, and thereafter, the servo write direction is switched to re-record the servo data in a range to an intermediate circumferential area on the disk medium. In this way, the servo data is re-recorded to correct servo data having worsened recording quality.
