

ABSTRACT

DISPLAY APPARATUS FOR AN OPERATIONAL FORCE FOR DISPLAYING
INFORMATION CONTENTS OF DIFFERENT INFORMATION TYPES OF A
GUIDANCE SYSTEM

5 A display apparatus for an emergency service member for displaying information
content of different information types from a guidance system is proposed. The
display apparatus comprises a display, carriable by the emergency service
member, having a plurality of visually distinguishable segments (21 - 28), with
each of which at least one of the information types is associated, each segment
10 being configured to visually output a current information content of the
information type associated with the segment. Further, the display apparatus
comprises an actuating unit, couplable to the guidance system, for actuating the
display.
