(54) Title: IMAGE PROCESSING METHOD AND APPARATUS

FIG. 2

(57) **Abstract:** An image processing method and apparatus are disclosed in embodiments of this specification. The method is performed at a mobile device that comprises a camera. The method comprises: acquiring a video stream of an accident vehicle by the camera according to a user instruction; obtaining an image of a current frame in the video stream; determining whether the image meets a predetermined criterion by inputting the image into a predetermined classification model; adding a target box and/or target segmentation information to the image by inputting the image into a target detection and segmentation model when the image meets the predetermined criterion, wherein the target box and the target segmentation information both correspond to at least one of vehicle parts and vehicle damage of the vehicle; and displaying the target box and/or the target segmentation information to the user.
