

**INFECTION-RESISTANT POLYURETHANE FOAMS, METHOD FOR PRODUCING
THE SAME AND USE THEREOF IN ANTISEPTIC WOUND DRESSINGS**

A b s t r a c t

The present invention describes microbicidal hydrophilic polyurethane foams endowed with polyhexamethylenebiguanide (PHMB) and/or its hydrochloride and also a superabsorbent, wound contact materials obtainable therefrom and processes for producing the therapeutically endowed polyurethane foams and the wound contact materials obtainable therefrom.
