Providing a chair comprising:

a base,

a seat supported by the base, and

a tablet supported by the base, the tablet being above and forward of the seat, the tablet having an upper front edge, a bottom rear edge, and a curved portion between the front edge and the bottom rear edge, the curved portion extending upwardly from adjacent the rear bottom edge to a position adjacent to a front portion of the tablet.

Sit on the seat of the chair in a first sitting position such that the chest of a seated user faces toward the tablet of the chair.

Sit on the chair in a second sitting position such that the back of the seated user engages the curved portion of the tablet.
