(54) Title: ENGINEERED PROTEINS WITH A PROTEASE CLEAVAGE SITE

FIGURE 9

(57) Abstract: Various aspects and embodiments herein relate to recombinant proteins with at least one protease recognition sequence that can be inactivated by a cognate protease and methods of preparing such proteins. In some embodiments, recombinant phosphoglucose isomerase (Pgi) proteins are provided. In other embodiments, recombinant phosphotransacetylase (Pta) proteins are provided. In yet other embodiments, recombinant transketolase A (TktA) proteins are provided.
