(54) Title: **MOUSE AND STAY THEREOF**

[Fig. 1]

(57) Abstract: A mouse and a stay thereof are disclosed. The mouse includes an up/down guide part formed on a body, and a finger supporting part supported by the up/down guide part so as to move up and down and including supporting arms extended opposite to each other in a width direction. The mouse stay includes a base plate to movably keep the mouse on, a connecting part hinged to a rear end portion of the base plate so that the connecting part can be pivoted to be folded or spread toward/from an upper surface of the base plate, and an extending part hinged to an upper end portion of the connecting part so that the extending part can be pivoted to be folded or spread toward/from a front surface of the connecting part. A mouse cable is connected to a front end portion of the extending part.
